

YOUNG PEOPLE AT A CROSSROADS

AN INTERNATIONAL STUDY

- **How much do you talk to your family about climate change and the environment?**
- **What do you and your family know and think about adapting to the challenges of climate change?**
- **Do you think teaching about climate change reflects global perspectives?**

In this research study participants will:

- **Participate in online focus groups with other 14–18-year-olds in Manchester and Melbourne.**
- **Interview parents/guardians about what they think about climate change and the environment.**
- **Contribute to a book of climate change responses from families in Australia and the UK**

If you are aged 14-18, living in Manchester or Melbourne, and one or both of your parents/guardians were born overseas then we would love to hear from you! We are particularly interested in families with roots in Africa, Asia, the Pacific, the Middle East or Central/South America.

If you are interested in taking part or want to know more, please scan the QR code or email:
